Aircraft Management in FSELeaseHub.

Upload, edit, and delete aircraft on the FSELeaseHub platform.

- 1- Aircraft Upload to FSELeaseHub.
- 2- Edit Aircraft in FSELeaseHub.
- 3- Change the Status of Published Aircraft and Delete

1- Aircraft Upload to FSELeaseHub.

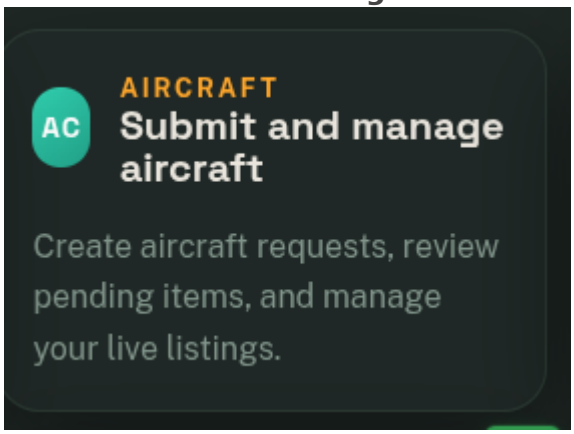

Once your FSELeaseHub account has been created and verified, you will be able to upload aircraft.

By doing this, your listing will be published on the website, and future pilots will be able to contact you if they are interested in your published aircraft.

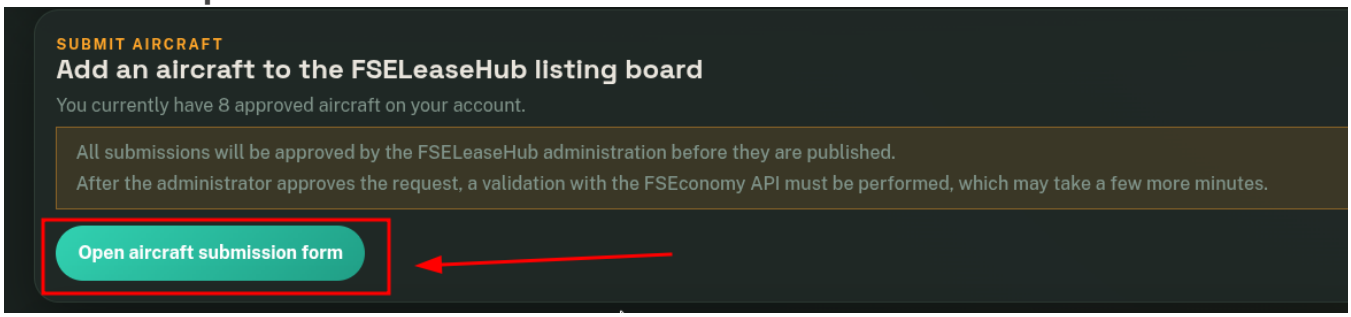

> **INFO:**
> All submitted requests must be reviewed by administrators and by the FSEconomy API. It may take several minutes to process this information before it is published on the website.
> Please respect the rules and instructions displayed on the page.

Aircraft Upload

1. Go to **Submit and Manage Aircraft**.

2. Click on the **Open Aircraft Submission Form** button.

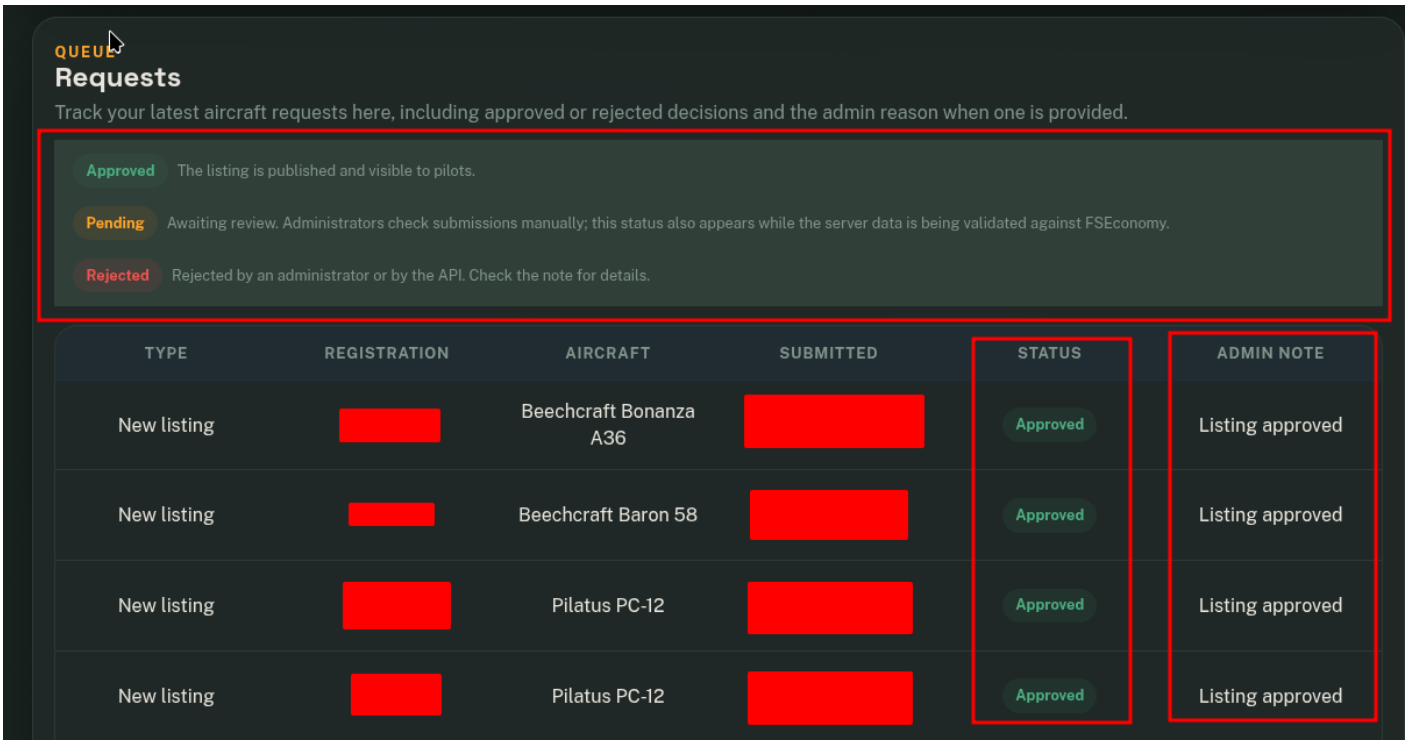

3. Complete all the information in the form. You can specify the conditions and upload images. Once finished, click on **Submit for Approval**.

At this point, you will need to wait for the Administrator's approval. Once the administrator approves your request, the aircraft will be added to a processing queue that will check the FSEconomy API, allowing the system to complete the aircraft information (model, location, and other data).

Track your latest aircraft requests

In this module, you will be able to view the status of your submitted aircraft. If an administrator has rejected your request, you will also be able to see the reason. Rejections from the FSEconomy API will also be displayed when the aircraft is not owned by you or if there is any type of error during this verification process.

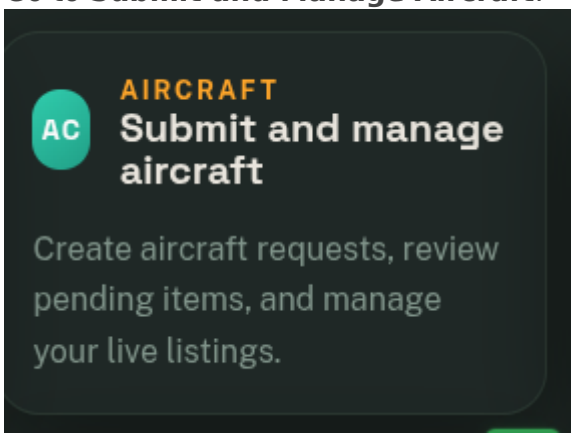

2- Edit Aircraft in FSELeaseHub.

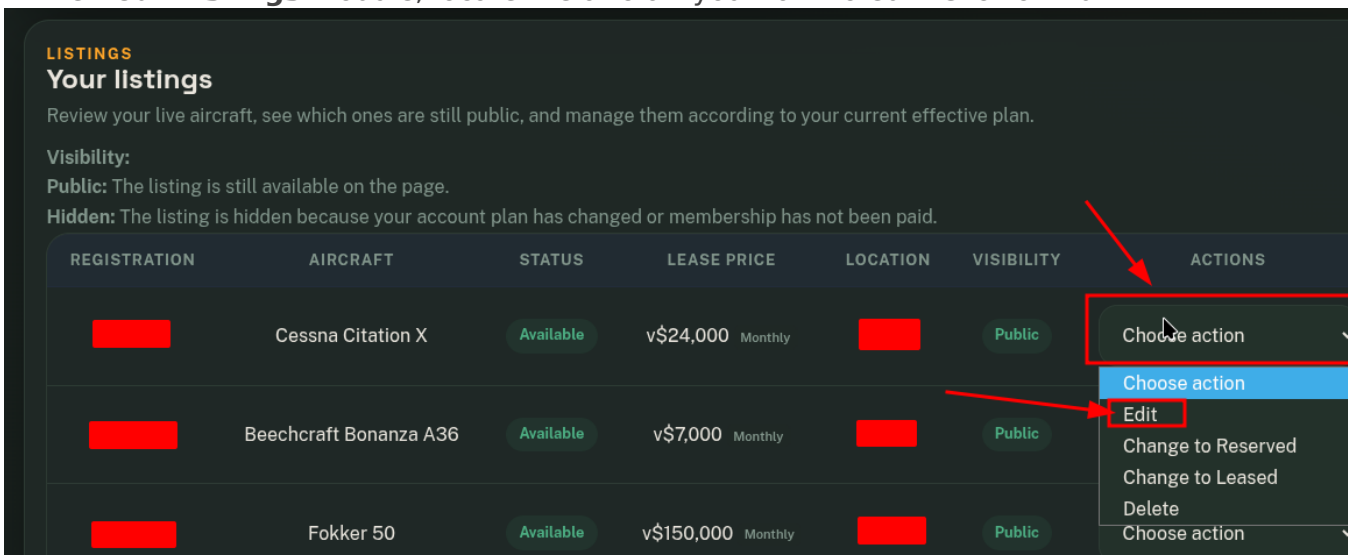

Once the aircraft have been uploaded to the FSELeaseHub platform, you will be able to edit them if you made a mistake or want to add more information to their listings.

INFO:
All Edit requests must be reviewed by administrators and by the FSEconomy API. It may take several minutes to process this information before it is published on the website.
Please respect the rules and instructions displayed on the page.

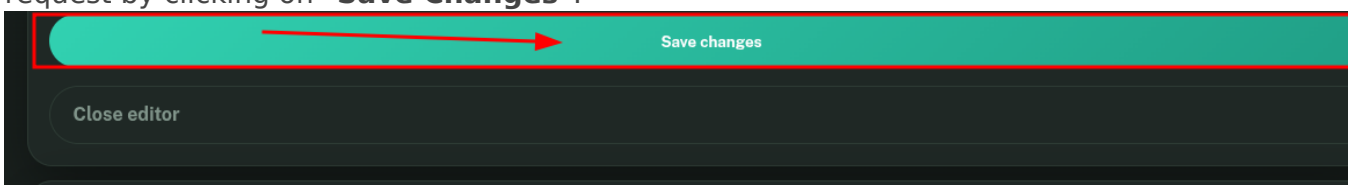

1. Go to **Submit and Manage Aircraft**.

2. In the **Your Listings** module, locate the aircraft you want to edit. Click on **Edit**.

3. Modify the information you need, and once all changes have been made, submit your request by clicking on **"Save Changes"**.

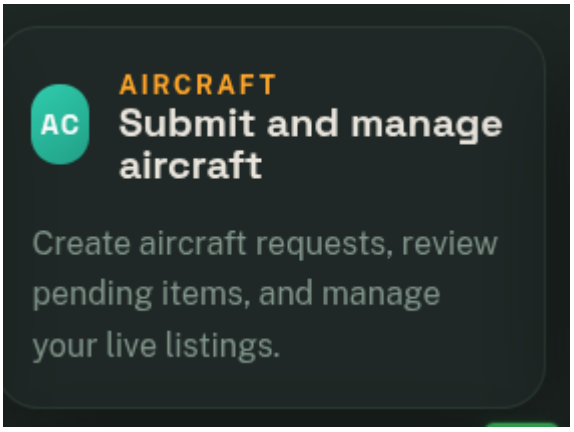

3- Change the Status of Published Aircraft and Delete

Aircraft Status

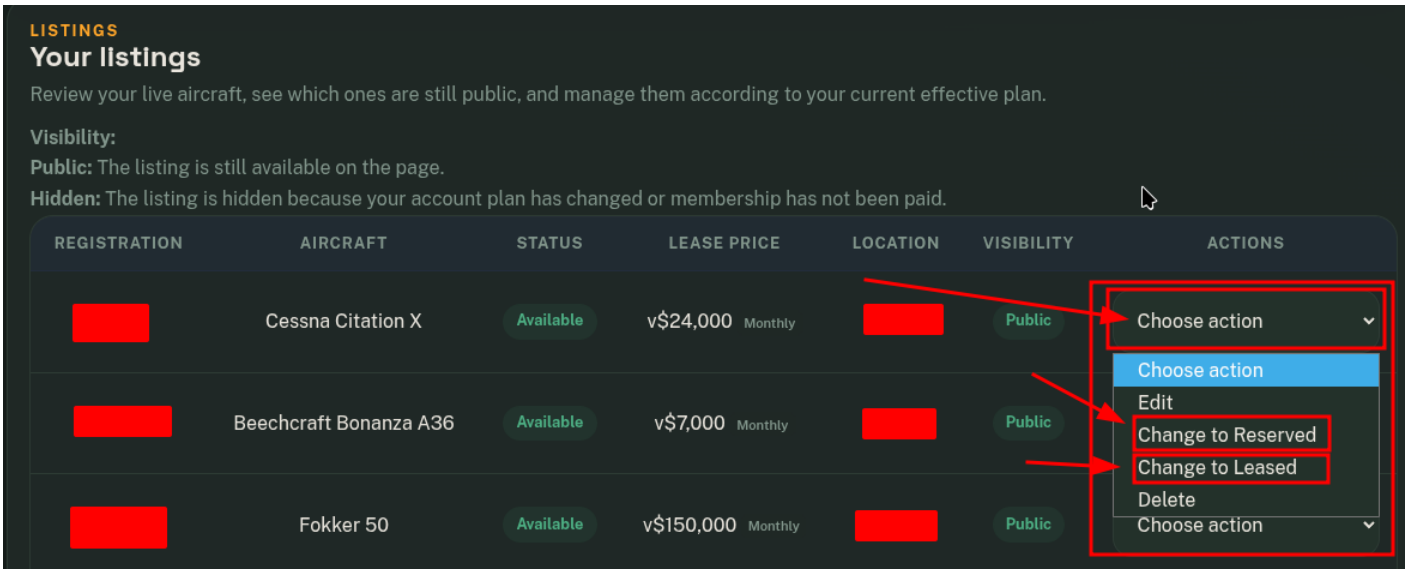

All published listings for your aircraft can have 3 different statuses:

- **Available:** The aircraft is published on the FSELeaseHub platform.
- **Leased:** The aircraft is still listed in your panel, but it will not appear in the public listings. When a pilot is interested in your aircraft, you can change it to this status so you do not have to delete it.
- **Reserved:** The aircraft is still listed in your panel, but it will not appear in the public listings. When you want to reserve an aircraft or temporarily stop publishing it, you can change it to this status so you do not have to delete it.

To change these statuses, go to **Submit and Manage Aircraft**.

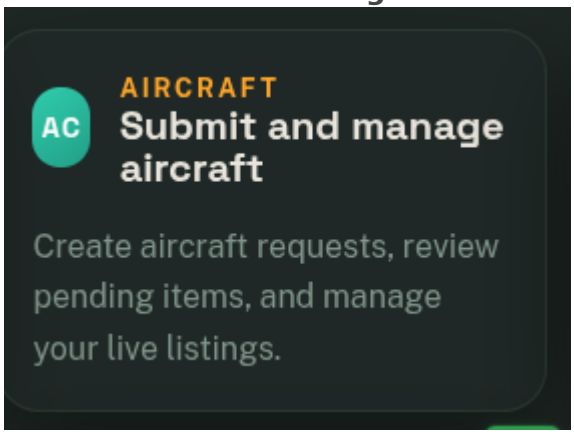

In the **Your Listings** module, click on **Actions** for the aircraft whose status you want to change, and you can switch it to **Reserved** or **Leased**.

Delete Aircraft

You can delete aircraft from FSELeaseHub by following this process.

1. Go to **Submit and Manage Aircraft**

2. In the **Your Listings** module, click on **Actions** for the aircraft you want to delete, then click on **Delete**.
