

Tools

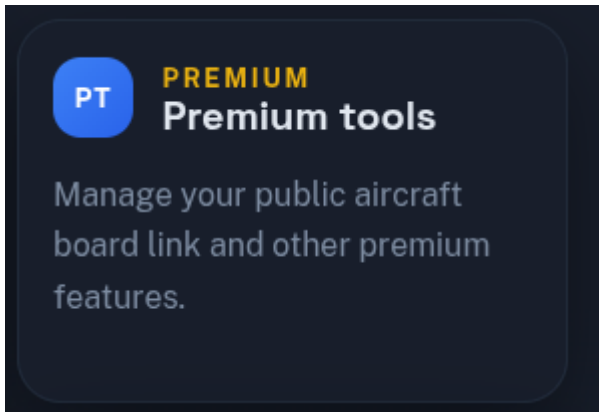

Manage your public aircraft board link and other features.

- [Description and Information](#)

Description and Information

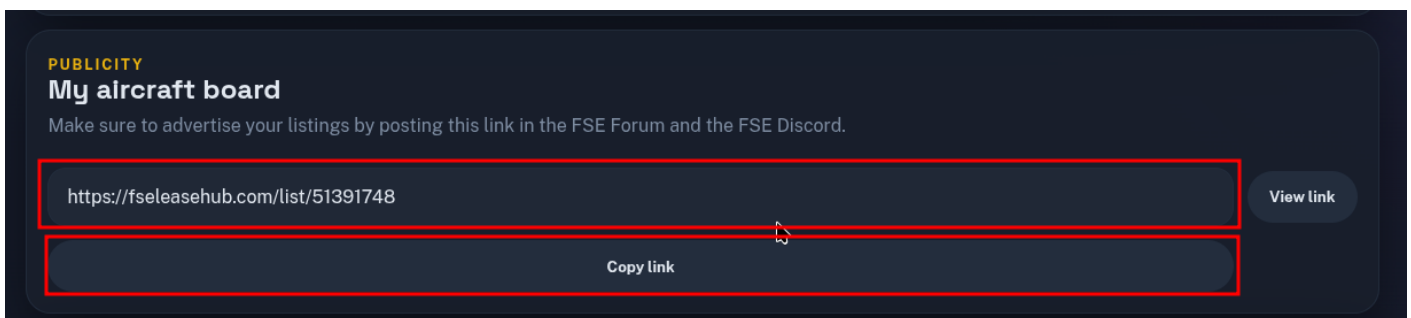

In this Premium Tools section, you will find useful tools available exclusively to users with premium memberships to promote/publish your aircraft.

To use these options, you need to go to Premium Tools:

My aircraft board

My Aircraft Board is your personalized URL for the aircraft you have published on the FSELeaseHub platform. Only your aircraft will appear there, not those of other users or groups. This way, you can share this URL on forums, Discord, or anywhere else so everyone can view your aircraft.

BBCode post template

In this section, we have prepared a predefined template for you to use on the FSEconomy forums. By using this template, the aircraft list will display the registration, price, frequency, model, location, and conditions. Simply paste this template into a new thread on the FSEconomy forums.

Discord post template

In this section, we have prepared a predefined template for you to use on Discord servers. By using this template, the aircraft list will display the registration, price, frequency, model, location, and conditions. Simply paste this template into a new thread on Discord.
